

**– JANUARY 2017 –**

---

## **ONGOING INITIATIVES**

### **1. Communications**

#### **A. Green Speaker Series – Invasive Phragmites**

Over 50 people attended the Invasive Phragmites roundtable on December 14<sup>th</sup> at the Essex County Civic Centre. The audience watched a video produced by the Essex Region Conservation Authority, and heard presentations from Ken Vegh, Town of Kingsville, Lu Ann Marentette, Town of Leamington, and Colin Cassin, Ontario Invasive Plant Council. Videos of the presentations are available on the WECEC website as well as on the WECEC youtube channel.

#### **B. Promotional Items**

The 2016 promotion budget was spent on 100 travel coffee mugs, 100 water bottles and native plant seeds. These will be distributed at events such as Earth Day.

#### **C. Urban Forest Management Plan**

In response to WECEC's request to be consulted with regards to the City's Urban Forest Management Plan, I have spoken with City Forester Paul Giroux and he has agreed to present at WECEC during the development of the Plan. He is currently undertaking an inventory of the trees in our City, so it will likely not be until 2018 that the process for the Urban Forest Management Plan begins. He is also happy to present the findings of the tree inventory to WECEC.

#### **D. Potential Green Speakers for 2017**

- Water Brothers.
- John Hartig – Detroit River International Wildlife Refuge has published a recent book titled Bringing Conservation to Cities: Lessons from Building the Detroit River International Wildlife Refuge.
- Alice Grgicak-Mannion – researcher and professor at GLIER has done some great mapping of contaminants and other information specific to Windsor/Essex.
- Contributing to the City of Windsor's movie night featuring a climate change or energy related documentary to promote the Community Energy Plan.

#### **E. Microbead Ban Coming 2018**

On November 5, 2016, the federal government published a proposed regulation in the Canada Gazette, entitled Microbeads in Toiletries Regulations, to ban the manufacture or import of most toiletries that contain microbeads on or after January 1, 2018. The prohibition applies to products that are natural health products or non-prescription drugs on or after July 1, 2018.

This past summer, microbeads less than 5mm in size were added to Schedule 1 of the Canadian Environmental Protection Act (CEPA), paving the way for regulatory controls.

## – January 2017 –

---

According to news reports, industries using microbeads had in many cases already voluntarily phased out microbeads by the time Canada had officially listed them as toxic. Five of fourteen of the heaviest users in Canada had already stopped using their products, with nine more expected to follow suit by 2018 or 2019.

### 2. Reports to Council

None pending at this time.
